

The Economy of the People

Viitasphere is the economy of the future, where everyday patrons, rather than a central power, control the economy. It will be a peer-to-peer mobile app which allows its community of users to search for and provide local services and goods. There will be three distinct user bases. The Viita Patron, the Viita Operative, and the Viita Merchant. Viitasphere grants its Patrons the ability to search locally for an independent contractor (Operative), or Merchant (someone who sells goods) to perform a task that they need completed or to purchase a product. The Patron and the Operative or Merchant will be able to quickly and easily connect via our platform. Whether you need a photographer, auto-mechanic, ride to work, home cooked meal, website developer, jewelry or makeup box, or a myriad of other scenarios or products, it can all be found on Viitasphere.

Working for oneself and experiencing financial freedom has never been easier. Viitasphere will effectively make every person who wishes a business owner. Whether the member wishes to offer goods for sale or operate their business providing services, Viitasphere will give them the best place to do both. Viitasphere will allow everyone using it to get the best price for provided goods and services without having to pay a middleman or mediator (like on other platforms such as Uber, Lyft, Airbnb, eBay, Postmates, Etsy, etc). This will afford people the opportunity to save countless amounts of money; Every penny paid for a product or service will go directly to the person providing it. None of that money will go to Viitasphere, as it is solely the platform that connects its users. This will make it possible for both parties to benefit in a true peer to peer economy. As a result, Viitasphere will become the world's first true Self-Regulating Economy.

How it Works

When setting up a Viitasphere profile you can choose to do so as a Patron only, or also as an Operative and/or Merchant. The Patron can search for local services or various goods, viewing a list of individual profiles of Operatives or Merchants offering the required service or good. Profiles will feature a picture of the Operative or Merchant and their work/product, a means of contact, a resume, the user's internal Viitasphere score (Viitasphere Community Standing), and a price quote. This will make searching for the most qualified worker, best product, or most affordable price, substantially easier and far quicker.

Each member will automatically be given a Patron account. Once they have completed the quick set up they will be ready to interact with other members and make purchases for goods and services. If a member wishes to add an Operative or Merchant page to their profile they can do so at any time. Adding an Operative page will enable the user to provide services that other Patrons can request. These services may include a ride to the airport, a home cooked meal, fixing a broken sink, wedding photography, etc. Adding a Merchant page to a profile will enable the user to sell products to Patrons. These goods may include jewelry, musical instruments, electronics, clothing, etc. Viitasphere will be able to connect all of its members in such a way that it will establish itself as its own communal economy.

Introducing VIITA Coin

Viitasphere will be offering its own coin available for transactions. VIITA Coin is the native currency of Viitasphere and will be instrumental in our pursuit of achieving mainstream adoption by means of its simplicity and real world implementation. Community members will be able to exchange for VIITA Coin on the platform using fiat, BTC, ETH, EOS, or TLOS and have it transferred to their account. From there they can send VIITA to friends and family as a gift or pay for services or goods. Using VIITA will enable members to enjoy free and instantaneous transactions. The ambitious goal of Viitasphere is for our coin to ultimately become the world's currency and for the platform to become a global market. We aim to gain mass adoption throughout the world and will undertake a vigorous marketing campaign to bring this goal to fruition. We want to position VIITA Coin as the first universally used international currency.

Innovative Rating System

Most platforms continue to use antiquated and easily manipulated review systems. A crucial and innovative aspect of Viitasphere is the comprehensive Rating system our community of users will be governing. Every Viitasphere community member will have a visible score or rating, called a Viitasphere Community Standing, on their respective profile pages. This score will be given to them based on their interactions within the Viitasphere community and will be amended after each transaction for accuracy.

These scores will be determined by a number of important factors, making it a more accurate and honest representation of the user as opposed to a general review system. The Viitasphere Community Standing score will be calculated by an accumulation of points given from Patron, Operative, and Merchant reviews received. After each transaction the Patron will rate the Operative or Merchant and they in turn will rate the Patron. Each rating will give the member a score, which will factor into their Viitasphere Community Standing. Our rating system will give our community members as much information as possible to ensure that they are able to make a secure and educated decision on who to work with.

The New Economy

Viitasphere will soon be looked at as one of the leaders and future champions of the entire blockchain. People will put their trust in a platform that has real value and offers a solution to a real need. Our platform will pave the way for not only our own success, but also the success and prosperity of all of its members. It is going to completely reshape how we think about and navigate in the world of commerce. The world and its billions of inhabitants are ready for a change. Viitasphere will lead the charge and spearhead the coming changes!

Are you ready?
